Team Lead at Frozeneon

Hi, I'm Dmitriy. I build *fast, SEO-driven websites* and lead the people who build them with me.

I've been doing PHP for six years: WordPress first, then Laravel, and now Statamic. These days I look after 24 production sites, mentor developers, choose the stack and get things deployed. I like clean architecture, boring deploys and automating anything I've had to do twice.

6 years in commercial web development	24 production sites I look after	14 Statamic projects, multisite & multilingual	2 developers mentored

01 / THE LAST 12 MONTHS

What I got done *this year*

01

Moved the infrastructure to Laravel Cloud

Set up a new server environment from scratch and moved our sites onto it, with predictable deploys for every project.

02

Updated 24 sites and kept them updated

Upgraded every site to the latest CMS and add-on versions, then set up Dependabot so dependency updates now arrive automatically instead of building up.

03

Stopped user data loss on deploy

Found that user accounts were wiped on redeploy and moved user storage to persistent storage across all Laravel Cloud projects.

04

Built the Hellcase blog on Statamic

Multisite, multilingual blog, built end to end on my side and delivered to the staging environment for team review before going live.

05

Redesign & migration

Built the new design for bestcs2cases.com and started moving the Analyst blog from WordPress to Statamic so our whole stack runs on the same CMS.

06

Brought AI tools into the team

Added Claude Code, Cursor and MCP servers (Laravel Boost, Playwright) into our daily development and automated the routine work around them.

02 / EXPERIENCE

Where I've *worked*

11.2025 — now

current

Frozeneon

Team Lead · Full-stack PHP Developer

I lead development of a portfolio of content and SEO websites in the CS2 / esports space, built on Statamic, Laravel and WordPress.

- → Mentoring developers and doing code review for the team
- → Designing web app architecture and choosing the tech stack for new projects
- → Full-cycle development, frontend and backend, plus deployment
- → Server environment setup, server data analysis, Cloudflare API and S3 integrations
- → Working with external contractors and the SEO team on new product ideas
- → Researching new integrations and automating repetitive workflows

08.2024 — 10.2025

OutSoft

PHP Developer

WordPress and Laravel projects for agency clients: online stores, landing pages and multi-page sites. Custom themes from scratch, WooCommerce customization, Laravel apps with MySQL, Eloquent, Blade and MVC architecture.

02.2023 — 08.2024

Remote Helpers

PHP Developer

WordPress and WooCommerce development and customization, custom themes and plugins (ACF, Polylang, WPML, Elementor), JS animations. My first Laravel projects: migrations, seeders, Eloquent models, Blade.

09.2022 — 02.2023

Onix Systems

PHP Developer

Landing pages, online stores and multi-page WordPress sites. Extended plugin functionality and built custom WooCommerce solutions.

04.2022 — 08.2022

DevOut Labs

PHP Developer

WordPress sites with ACF Pro and Contact Form 7, JS animations and fully editable content and menus for clients.

01.2022 — 04.2022

Lion Internal

PHP Developer

Store payment system configuration, new site logic and pages, bug fixing on WooCommerce.

2021 — 2022

Freelance, Upwork

Front-end / PHP Developer

My start: landing pages, stores and WordPress themes for clients worldwide.

03 / STACK

Tools I *use*

● new = picked up in the last year

Backend

PHP · Laravel · ● Statamic · ● Statamic add-ons · ● Multisite / multilingual · ● Livewire · ● Filament PHP · WordPress · WooCommerce · ACF · WPML / Polylang · MySQL · REST API

Frontend

JavaScript · ● Vue 3 · ● Vite · ● Three.js / WebGL · ● Gulp · SCSS · HTML / CSS · jQuery · Bootstrap · Figma · Photoshop

Infrastructure

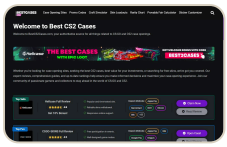

● Laravel Cloud · Docker · ● Cloudflare API · ● S3 storage · ● Dependabot · Git / GitHub / Bitbucket · ● Blender

AI in my workflow

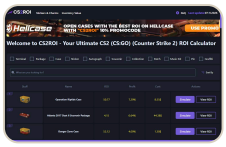

● Claude Code · ● Cursor · ● Cline · ● Gemini · ● MCP: Laravel Boost · ● MCP: Playwright

05 / BACKGROUND

Beyond *the code*

Education

Ukrainian State University of Railway Transport
Automation, computer-integrated technologies & robotics · IT specialist · 2023–2025

Ukrainian State University of Railway Transport
Information-control systems & technologies · Engineer · 2020–2023

Kharkiv State Polytechnic College
Automated motion control systems · Electrician · 2016–2020

SoloLearn
Programming courses · 2020–2021

Languages

Ukrainian	C2
Russian	C2
English	B1

Outside work

I spend evenings improving my server skills and testing AI add-ons that could help the team. Away from the screen:

- Football
- Volleyball
- Electronics
- Dev trends
