SUMMARY

Team Lead and full-stack PHP developer with 6 years of commercial experience in Laravel, Statamic and WordPress. I lead development of a portfolio of 24 production websites: I design the architecture, choose the tech stack, own deployment on Laravel Cloud, review code and mentor developers. Strong in SEO-driven content sites, multisite and multilingual setups, and automating developer workflows with AI tools. Working remotely from Kharkiv, Ukraine.

6 years
commercial PHP development

24 sites
in production under my lead

3 CMS
Statamic, Laravel, WordPress

2 developers
mentored

EXPERIENCE

Frozeneon - Team Lead / Full-stack PHP Developer

11.2025 - Present | Remote

Lead development of 24 content and SEO websites in the CS2 / esports niche: 14 on Statamic, 2 on Laravel, 8 on WordPress.

LEADERSHIP

- **Team:** mentor developers (2 so far) and run code review for the team.
- **Architecture:** design web application architecture and choose the tech stack for new projects.
- **Delivery:** own the full cycle from frontend and backend to deployment and production support.
- **Collaboration:** work with external contractors, DevOps and the SEO team; take an active part in planning new products.
- **Process:** optimize team workflows, automate routine tasks and bring AI tools into the development cycle.

KEY RESULTS

- Set up a new server environment on **Laravel Cloud** and moved the sites onto it with a predictable deployment flow.
- Upgraded **all 24 sites** to the latest CMS and add-on versions; set up **GitHub Dependabot** so dependency updates now arrive automatically.
- **Eliminated user data loss on deploy** across all Laravel Cloud projects by moving user data to persistent storage.
- Built the **Hellcase blog** on Statamic (multisite, multilingual) end to end and delivered it to staging for release.
- Delivered the redesign of **bestcs2cases.com**; leading the migration of the Analyst blog from WordPress to Statamic.
- Brought **Claude Code, Cursor and MCP** (Laravel Boost, Playwright) into daily development.

OutSoft - PHP Developer

11.2024 - 10.2025

- Built Laravel web applications: MySQL database design, migrations, seeders, Eloquent models, Blade views, MVC architecture.
- Developed WordPress and WooCommerce projects for agency clients: online stores, landing pages, custom themes from scratch.

Remote Helpers - PHP Developer 04.2023 - 11.2024

- Developed and customized WordPress and WooCommerce sites, custom themes and plugins (ACF, WPML, Polylang, Elementor).
- Started commercial Laravel development: migrations, seeders, Eloquent, Blade.

Onix Systems - PHP Developer 09.2022 - 04.2023

- Built landing pages, online stores and multi-page WordPress sites; extended plugin functionality and custom WooCommerce solutions.

Freelance & Contract Work - PHP / Front-end Developer 01.2021 - 08.2022

- **Upwork clients:** landing pages, online stores and custom WordPress themes.
- **DevOut Labs (contract, 04.2022 - 08.2022):** WordPress sites with ACF Pro, fully editable content and JS animations.
- **Lion Internal (contract, 01.2022 - 04.2022):** WooCommerce payment configuration, new site logic and bug fixing.

SKILLS

Backend: PHP 8, Laravel, Statamic (add-ons, multisite, multilingual), Livewire, Filament, Eloquent ORM, Blade, REST API, MVC, MySQL, WordPress, WooCommerce, ACF, WPML, Polylang

Frontend: JavaScript, Vue 3, Vite, Three.js / WebGL, HTML5, CSS3, SCSS, Gulp, jQuery, Bootstrap, Figma

Infrastructure & DevOps: Laravel Cloud, Docker, Cloudflare API, AWS S3, Git, GitHub, Bitbucket, GitHub Dependabot, deployment, server environment setup

AI tools: Claude Code, Cursor, Cline, Google Gemini, Model Context Protocol (MCP): Laravel Boost, Playwright

Leadership & practices: team leadership, mentoring, code review, software architecture, tech stack selection, technical SEO, performance optimization, workflow automation
